

SAVING RESULTS ON LAPMASTER USING A MEMORY STICK

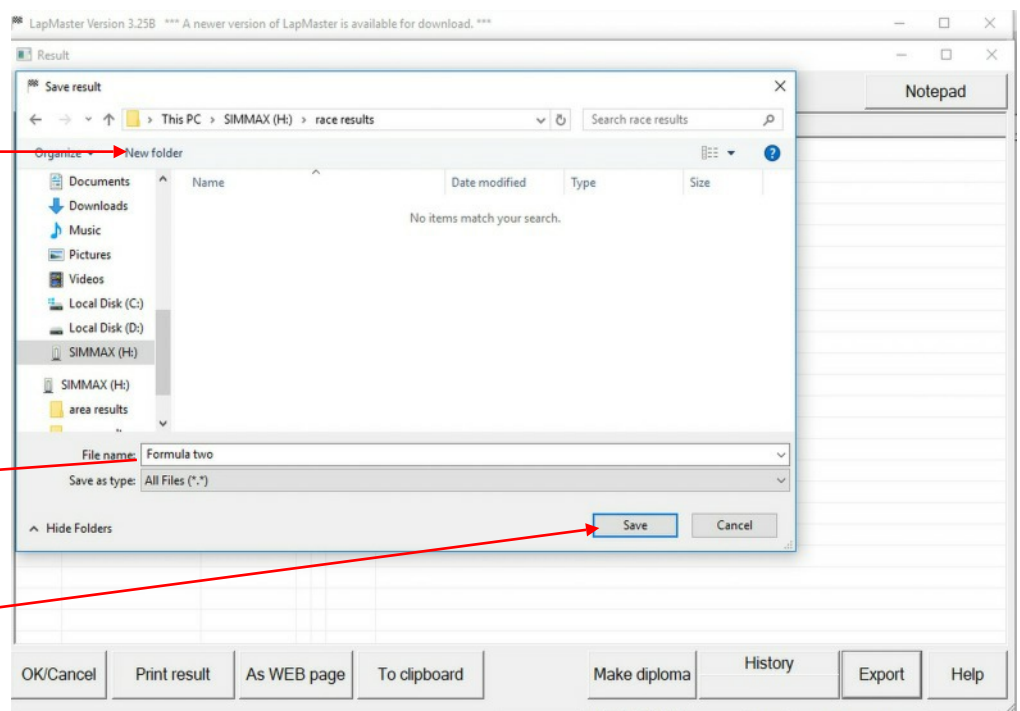

Go to the results screen
Toss your memory stick in a usb port
Click on the EXPORT button

2) create a folder on the stick
and name it

1) Find the stick
In the drop down

3) call the result a name

4) Hit Save - job done!

5) Save results of all classes of the event in the same folder.

The saved files can be easily e-mailed or opened in “notebook” and then copied and pasted into an excel document to create decent race results. Far quicker and more accurate than having to type!
